

Can you help us share vital safety information ahead of the Summer break?

Historically Derbyshire has seen a sharp increase in incidents in local areas over school holidays and we would like to ask for your assistance in sharing the following safety information through your text messaging service, Social Media Channels, or School Website.

The water safety message is even more poignant at the moment as the UK has just witnessed seven people losing their lives in water over one weekend alone, with one of those tragically being in a quarry in Derbyshire. At the time of writing, a further search is ongoing in the South of our county for another man last seen in difficulty in the River Trent at Swarkestone.

Primary School resources [here](#)

We know young people will want to enjoy the warmer weather, so here is a link to an approved list of [aqua parks](#).

Derbyshire Fire & Rescue Service will continue to post safety advice and information to its own social media channels over the summer and if your school could share those important messages that would be fantastic.
